Sightscreens – Care & Maintenance

Our sightscreens are designed to be lightweight and easily manoeuvrable. We therefore suggest you remove some of the boards if windy weather is likely. If you have a windy site we can supply stabilising pegs to help you secure your sight screens.

Maintenance

- Check and tighten all nuts and bolts on a monthly basis.
- The boards can be cleaned using a damp cloth/sponge and soapy water.
- Lubricate the bearings on wheel axles.
